Santa Clara
Ciocca Center
for Innovation and Entrepreneurship

A note from the Director of Bronco Ventures

Welcome to Demo Day!

On behalf of Santa Clara University and the Ciocca Center for Innovation and Entrepreneurship, it is my pleasure to welcome you to our seventh annual **Bronco Ventures Demo Day**.

The **Bronco Ventures Accelerator (BVA)** was created to provide Santa Clara founders—students, alumni, faculty, and staff—with guidance, mentorship, and resources to transform promising business ideas into thriving ventures. Over the past four months, our BVA7 cohort of over 30 early-stage startups has worked to refine business models, validate products with customers, build partnerships, and develop presentation skills. Now we've selected some of our founders to share their stories with you.

Bronco Ventures also includes programs such as our quarterly **Idea Lab**, for founders at the earliest stage of company formation, our spring **Accelerator Prep School**, which equips early stage ventures with the tools needed to enter the BVA or other accelerator programs, and a monthly open meetup of our entrepreneurship community called **BVA Cafe**.

We are grateful for the many mentors, advisors, investors, and sponsors whose expertise and support make this work possible. Your investments of time and capital strengthen the entrepreneurial ecosystem at Santa Clara and empower the next generation of founders to pursue bold ideas with purpose and integrity.

Thank you for joining us today!

Warm regards,
Morgan Slain
Founder and Director, Bronco Ventures
Santa Clara University

AmolinoAI

Amolino is an agentic sales execution platform that leverages AI and ML to learn, distill and scale your top sales performers' strategies and skills, proactively guiding every rep with winning moves and actionable insights to increase win rates by 25%.

Aseem Asthana, Founder

Contact: aseem@amolino.ai

Website: https://amolino.ai

Beebizy

Beebizy is changing the event space with an AI-powered service making it easy to plan, book and manage anything from a birthday bash to a 500-person corporate event. Like DoorDash changed restaurant food delivery, Beebizy is transforming event planning into a seamless, smart and delightful process.

Laila Marshall, Founder

Contact: laila@beebizy.com

Website: www.beebizy.com

Brand Story Machine

Brand Story Machine democratizes access to professional brand strategy and messaging by delivering in just one day and at a fraction of the cost. Built for time-strapped, resource-conscious founders, it blends human expertise with AI and behavioral science—because a clear, consistent narrative drives efficient growth.

Shannon Riordan, Founder

Contact: shannon@make-your-brand.com

Website: https://www.make-your-brand.com

Career Library

Career Library is a digital platform addressing the gap in authentic career exploration for high school and college students. Through engaging video stories from professionals, the platform helps students connect their majors and interests to real career paths across all industries.

Minny Walia, Founder

Contact: minny@careerlibrary.org

Website: https://www.careerlibrary.org

Clara Score

Clara is an AI-powered sustainability platform that transforms complex ESG data into captivating, swipeable brand stories. We connect fashion brands doing the hard work with consumers who care by turning compliance into credibility and sustainability into a marketing superpower. Think of Clara as the connectivity of LinkedIn and the simplicity of scrolling on Airbnb to brought to sustainability.

Sophia Zuchetto, Founder

Contact: szuchetto@scu.edu

Website: https://clarascore.com

Customer Vineyard

Like credit scores for every adult American measure and manage risk, Customer Vineyard's **CORE SCORE** identifies **CUSTOMER OPPORTUNITY**, so businesses know where to focus to unlock ROI for every customer or prospect. Our AI-empowered algorithms translate multiple national datasets to create 100-point scores by individual, versioned by industry.

MJ Dale, Founder

Contact: mj@customervineyard.com

Website: https://customervineyard.com

December Yaupon Company

The December Yaupon Company began operations in Seattle in 2023, and bootstrapped to sales of $200,000 with strong margins in their first full year in business. The team is riding that momentum to launch a line of ready-to-drink yaupon cold brews based on best-selling recipes, followed by concentrates, pods, instant yaupon and bulk ingredients.

Ian McCluskey, Co-Founder

Contact: ian@decemberyaupon.com

Website: https://diasporaseattle.com

Define Medical

We're building a non-invasive, vendor-neutral platform that turns standard angiograms into real-time 3D and physiological maps that help cardiologists assess coronary flow without wires, reduce procedure time, and improve outcomes for patients with CAD.

Alejandro Rendon, Founder

Contact: arendonsanchez@outlook.com

Website: https://define-medical.com/

Diskify

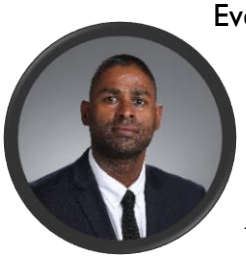
Diskify is changing the way we search for files, replacing folders and filenames with AI that lets you find anything just by asking. Search for your data the way you think, not the way it's stored.

Francisco Salinas, Founder

Contact: fsalinas@diskify.com

Website: https://www.diskify.com/

everb



Everb is an AI-powered healthcare platform reimagining the patient–provider relationship. We make medical teams a daily presence through real-time insights, seamless integration with clinical workflows, and continuous monitoring via wearables. By bridging technology and care, Everb transforms healthcare from reactive to proactive, ensuring smarter, connected outcomes for patients and providers alike.

Trevor Bikhram, Founder

Contact: tbikhram@scu.edu

Flora Haven

Flora Haven is a multi-purpose premium floral boutique, interior design showroom, and event venue that blends nature, creativity, and community - all in one Instagram-worthy destination. From fresh flowers to curated interiors and dreamy events, every corner is designed to inspire, connect, and bloom. Our 11,000 sq. ft. flagship in San Jose is designed as a sensory, nature-filled retreat unlike anything in the Bay Area.

Minnie Uyen Thai, Founder

Contact: florahavenretreat@gmail.com

Website: https://florahaven.com

FluidAI

We leverage recent advances in AI to deliver faster, more accurate, and more informative fluid dynamics simulations. Our custom AI-physics models provide engineers faster feedback on their designs, helping them to iterate more efficiently and achieve a stronger final result.

Matt Uffenheimer, Founder

Contact: matt@fluidailabs.com

Website: www.fluidailabs.com

Homestands

Homestands is building a next-generation sports ticketing platform that transforms how season ticket holders manage, share, and sell their seats. Unlike anonymous secondary marketplaces, Homestands gives season ticket holders full control over their inventory, enabling personalized transactions, relationship-building with buyers, and powerful management tools that serve as a digital assistant throughout the entire season.

Jamie Zimmerman, Founder

Contact: jamie@homestands.com

Website: www.homestands.com

Investra

Investra is a real estate investment platform with agentic capabilities that instantly evaluates properties, projects returns, and surfaces high-performing opportunities, empowering both investors and realtors to make data-driven decisions in minutes.

Lilit Yenokyan, Founder

Contact: lilit@investra-ai.com

Website: https://investra-ai.com/

Legacy Flows

Legacy Flows provides tax and accounting firms an end-to-end platform to automate internal operations and tax preparation, combining deep industry expertise and process automation to drive efficiency, scalability, and leadership through a major generational shift.

Philip Park, Founder

Contact: phil.park@legacyflows.com

Website: https://legacyflows.com/

Léoa

Léoa is a wellness energy drink brand that offers a cleaner, better-for-you alternative to traditional energy drinks. Our beverages use natural caffeine, adaptogens, and other functional nootropics to support focus and energy without the crash. Our goal is to build a standout brand that merges health, lifestyle, and innovation for the modern consumer.

Ari Martin, Founder

Contact: azmartin@scu.edu

Mill Pond Research

Mill Pond Research specializes in building AI solutions for large enterprises and government agencies. We deploy custom AI environments through our Workbench platform, which allows for the use of plugins, local and foundational models, while our Xilos solution secures, governs, and orchestrates agentic AI traffic.

Andrew Shimshock, Founder

Contact: andrew@millpondresearch.com

Website: https://millpondresearch.com/

Nevap

A medical device company developing high-impact airway management devices.

Benjamin Wang, MD, Founder

Contact: benjaminrwang@gmail.com

Website: www.nevap.co

Nxtas.ai

AI-driven predictive intelligence for EV batteries

Hari Venkata, CEO & Co-Founder

Contact: hvenkata@nxtas.com

Website: https://nxtas.ai

Obvi AI

Obvi AI simplifies intellectual property. Our platform uses AI/ML and GenAI to analyze patents, trademarks, and legal proceedings, helping you make smarter, faster IP decisions, whether you're conducting clearance searches, analyzing portfolios, or navigating complex legal landscapes. Built for both legal and business users, we provide powerful search and intuitive analysis for all.

Gail Jefferson, Founder

Contact: info@obvi.gavel-and-algorithm.com

Website: https://obvi.gavel-and-algorithm.com/

OmicXHealth

OmicXHealth is a software-first liquid biopsy company using AI/ML to detect cancer and chronic disease through a simple blood draw. Our platform analyzes cfDNA methylation patterns with high sensitivity and generalizability, enabling earlier, more accurate diagnosis than existing tools. We are initially focused on liver cancer, with future applications in recurrence monitoring, therapy resistance, and multi-cancer screening.

Mythili Subharam, Founder

Contact: mythili.subharam@omicxhealth.com

Website: www.omicxhealth.com

Qhronos Quantum

Qhronos empowers users to design, prototype, and deploy quantum algorithms through an easy-to-use workflow builder, then distributes those algorithms seamlessly across multiple quantum devices. Our platform unlocks the potential of distributed quantum computing for commercial and research applications.

Ionel Miu, Founder

Contact: ionel.miu@gmail.com

Quadcore Innovations

Nuff.Cash, a fintech app from Quadcore Innovations, enables financial inclusion by providing a digital alternative to paper currency while maintaining trust and providing anonymity to users. The Nuff wallet can be used for essentials like bill payments, groceries, rent, international transfers, shop partnerships, and much more.

Mahesh Jammalamadaka, Founder

Contact: mahesh@quadcore-innovations.com

Website: https://quadcore-innovations.com

Republican Red Winery

Republican Red Winery produces wine and merch for freedom-loving Americans to signal their conservative values and connect with others. Having achieved significant traction online, the company is seeking investment to expand into retail distribution.

Paul Johnson, Founder

Contact: paul@republicanred.com

Website: https://RepublicanRed.com

SubHub AI

Pre-construction is a bottleneck: to price a project, builders usually have to chase quotes from dozens of outside companies, and any planset revisions make them start over. SubHub AI builds the whole cost breakdown in seconds—listing materials, quantities, and local quoted unit prices from global wholesalers—so now months turn into days, and the back-office payroll cost to bid goes from $10,000~ to just a final check.

Blake Martin, Founder

Contact: blake@subhubtech.com

Website: https://subhubtech.com

Toyful Software and IT Services

Toyful is a smart parenting app to buy, sell, and rent kids' products, track vaccines, store medical records, find services, and connect with other parents to ask questions and share insights.

Praneet Jain, Founder

Contact: praneet@toyful.in

Website: https://toyful.in

Tumeryk

Tumeryk is a technology company at the forefront of agentic application security, specializing in solutions that ensure the safe and trustworthy deployment of Generative AI (Gen AI) applications.

Rohit Valia, Founder

Contact: rohit.valia@gmail.com

Website: http://tumeryk.com

TwinCounsel

TwinCounsel is an AI-powered service that operates directly within a lawyer's email inbox, requiring no new software. We provide a daily, prioritized "Command Center" dashboard to manage all active matters. From there, our AI agent helps legal teams generate accurate, first-draft documents using their own templates and case data.

Josh Dorward, Founder

Contact: josh@twincounsel.com

Website: www.twincounsel.com
